CE CREDITS: 1.0 In March 2018, the American Dental Association (ADA) announced a new policy on opioids supporting mandates on prescription limits and continuing education in what could be the first of its kind among major health care professional organizations.

The policy states: The ADA supports mandatory continuing education in prescribing opioids and other controlled substances. · The ADA supports statutory limits on opioid dosage and duration of no more than seven days for the treatment of acute pain, consistent with the Centers for Disease Control and Prevention evidence-based guidelines. · The ADA supports dentists registering with and utilizing Prescription Drug Monitoring Programs (PDMPs) to promote the appropriate use of opioids and deter misuse and abuse.

Speaker Bio:

Dr. Paul C. Lopez attended the University of Connecticut for his undergraduate degree and graduated with a Bachelor of Science in Physiology and Neurobiology. After college, Dr. Lopez chose to continue his education by attending the University of Michigan School of Dentistry, where he earned his Doctorate of Dental Surgery (DDS). Dr. Lopez felt he could give his patients the best experience by furthering his education and knowledge and attending medical school. He earned his medical degree from the University of Michigan Medical School. In addition, he has received specialty training in dentoalveolar reconstruction and corrective jaw surgery and received three consecutive U of M Medical School Bronze Beeper Awards — presented to resident physicians who exemplify the high standards of medical student education, leadership, and patient care. He completed his Oral and Maxillofacial residency at the University of Michigan Hospital System. Dr. Paul C. Lopez joined Michigan Oral Surgeons in 2014 after completing his residency in Oral and Maxillofacial Surgery at the University of Michigan Health System. Dr. Lopez originally hails from New York State. He was born in Manhattan and grew up in Yonkers. He gained his first interest in dentistry while working at a neuro-rehabilitation facility. He fell in love with the complexity of restoring both function and aesthetics to the mouth and face. He decided to pursue oral and maxillofacial surgery because he enjoyed the challenge presented by this broad subspecialty and the transformational results that can be achieved. Dr. Lopez is a Board Certified Oral and Maxillofacial Surgeon; he currently serves as the Section Head for Oral and Maxillofacial Surgery in the Department of Surgery at St. Joseph Mercy in Ann Arbor and is on staff at Chelsea Hospital.

Course Overview:

This course will discuss how and the recent prescription writing of narcotics has changed and how it will affect you.

Course Objectives:

Upon completion of this lecture participants should be able to:

- understand basic nature of the current opioid addiction crisis as a social and professional crisis
- understand the basic mechanism of addiction and its nature as a disease
- gain insight in to the role of the well-intentioned practitioner in fueling the current opioid crisis
- awareness of legal efforts to combat the growing opioid addiction crisis
- examining cultural efforts our profession can enact to battle the addiction crisis

Margherita Fontana, DDS, PhD, holds the position of Professor (tenured) in the Department of Cariology, Restorative Sciences and Endodontics at University of Michigan School of Dentistry. After receiving her dental degree from the Universidad Central de Venezuela (UCV), Caracas Venezuela, in 1990, Dr. Fontana worked as a Research Assistant in the Dental Research Institute, Dental School, UCV for two years, while she also worked in private practice. In 1992 she moved to the United States to pursue her research interests, and in 1996 completed a four-year PhD program in Dental Sciences at Indiana University, Indianapolis, IN. She served in the full time faculty at Indiana University until the Fall of 2009. She currently maintains an Affiliate position at Indiana University. She has always been very involved in teaching (problem based learning, laboratory and didactic) in Cariology in the DDS, postdoctoral and dental hygiene programs. At the University of Michigan she is currently codirector of the cariology I and II courses, and cariology discipline co-coordinator at the School of Dentistry. As a principal investigator, she has received research grants from the National Institute of Health, the Centers for Medicare and Medicaid, the American Association of Pediatric Dentistry, the Delta Dental Fund, DentaQuest, and private industry. Dr. Fontana has lectured as an invited speaker in different countries being recognized for her work in the field of Cariology. She was the first president for the Indiana Chapter of the Hispanic Dental Association, and has been a member for many years of the International Association for Dental Research, the European Organization for Caries Research (ORCA), and the American Society for Microbiology. She was the 2007-2008 President of the Cariology group of the International Association for Dental Research, the 2010-2011 Chair of the Cariology Section of the American Dental Education Association (where she currently serves as councilor), and a Fellow in the 2011-2012 class of the Hedwig van Ameringen Executive Leadership in Academic Medicine (ELAM) Program for Women. In 2012 she received the US Presidential Early Career Award for Scientists and Engineers (PECASE) for her work on caries risk assessment in children.

Course Overview:

The objective of this presentation is to provide an overview of currently accepted, evidence-based and/or expert opinion recommendations for the prevention and management of dental caries in dental practice. Discussions are centered on current concepts for caries lesion detection, including thresholds for caries tissue removal, and a review of caries management interventions for caries disease management in at risk patients.

Course Objectives:

At the end of this program attendees will be able to:

- 1) Discuss current principles for modern caries management and their applications to clinical care
- 2) Compare and contrast the evidence supporting different strategies for the non-surgical management of non cavitated caries lesions (including sealants, fluorides, calcium based strategies and antimicrobials)
- 3) Compare and contrast the evidence supporting different strategies for the non-surgical management of cavitated caries lesions, with a focus on Silver Diamine Fluoride for use in adults and children
- 4) Discuss the advantages and disadvantages of different thresholds for caries removal when considering management of caries lesions

PM Speaker Bio

Kevin Boyd, DDS, MS is a board-certified pediatric dentist practicing in Chicago. He is also an attending instructor in the residency-training program in Pediatric Dentistry at Lurie Children's Hospital where he additionally serves as a dental consultant to the Sleep Medicine service. Prior to completing his dental degree from Loyola University's Chicago College of Dentistry in 1986, he obtained an advanced degree (M.Sc.) in Human Nutrition from Michigan State University where his research interests were focused on unhealthy eating, dental caries, obesity and diabetes. Dr. Kevin Boyd attended the University of Iowa for his post-graduate residency training where he received a Certificate in Pediatric Dentistry in 1988. Dr. Boyd has served on the teaching faculties of the University of Illinois College of Dentistry, the University of Michigan's College of Dentistry, the University of Chicago Hospital, Rush Presbyterian-St. Luke's Medical Center and Michael Reese Hospital as an attending clinical instructor. His strong academic background in nutritional biochemistry has been instrumental in motivating the importance he places on nutrition as being a key component of each child's dental health plan. Since 2012 Dr. Boyd has been a Visiting Scholar at the University of Pennsylvania's Museum of Archaeology and Anthropology where he is conducting research with one of Penn's Orthodontic faculty; their research is focused on human craniofacial morphology of skulls from the pre-industrial Morton Crania Collection.

Course Overview:

The objective of this presentation is to provide an overview of Dr. Boyd's research in Human Nutrition, Anthropology and craniofacial development.

REGISTRATION CLOSES JANUARY 15, 2019 – Space is Limited

DIRECTIONS:

From Detroit/Ann Arbor/Points East: Take I-94 westbound to the Chelsea/Manchester exit #159. The exit ramp will curve sharply to the right to a traffic light (M-52.) Turn left at the light and travel approximately 2 miles north on M-52 until you reach downtown Chelsea. The first downtown traffic light will be at the intersection of Park Street and M-52. Park Street is labeled as South Street on the opposite side of M-52. Turn right at this light. The theatre (brick exterior) is on the left side approximately 100 yards down Park Street. Parking is available on Park Street or in the municipal lot next to the theatre. You may use this same parking location for the restaurant as well. Ann Arbor Pediatric Dentistry, is one block west of the theater on M-52 (Main St). Purple Rose Theatre Phone # 734-433-7673. www.purplerosetheatre.org

Performance- "Never not Once"

Eleanor, a biology major at Princeton, brings her boyfriend Rob home to meet her two moms. While there, she lets them know that she has hired a private investigator to help her find her biological father. She says, as a scientist, she is curious about her genetics. But it's evident she might also just want to meet her dad. Nadine, her non-biological mom thinks it's a great idea. Allison, Eleanor's biological mom is insisting that Eleanor's father, a one night stand in college whose name Allison doesn't remember, never even knew she existed. Eleanor is sent on a journey to an unexpected and explosive answer to the question "Where do I come from?" *Contains adult language & content.

MDA's Online Course Selection Expands

The MDA has expanded its menu of online continuing education courses ~ both MDA courses and courses available through the MDA's WCEA online CE portal.

MDA courses include:

- Opioids, Addiction, and the Treatment of Pain, with Don Teater, MD, MPH.
- Human Trafficking Identification: Take a Closer Look, with Sheila Ann Meshinski, BSN, RN, CEN, CFN.
- Key Factors for Hiring Exceptional Personnel, with Jodi Schafer, SPHR, and Brandy Ryan, SPHR.
- Digital and Social Media Marketing for Dental Practices, with Jenny Armistead and Jason Heinrich.
- Staff Performance: Appraisals, Training, and What's on the Horizon, with Jodi Schafer, SPHR, and Brandy Ryan, SPHR.
- Financial Systems Training for Front Office Personnel, with William van Dyk, DDS.

Top 10 Infection Control Questions You May Have Considered But Were Afraid to Ask, with Marie Fluent, DDS.

You can access the complete listing of MDA online courses at michigandental.org/MDA-Online-CE.

In addition, the WCEA online portal offers access to more than 1,800 online CE courses, with hundreds of them free. Online courses cover a wide variety of topics, including courses for dentists, RDHs, and RDAs. Registration is free at michigandental.org/WCEA.

You can access details about MDA and other in-person courses at michigandental.org/CE-Courses.

2020 Mission of Mercy Set for Flint

The MDA Foundation Board of Directors on Sept. 21 approved moving forward with another Michigan Mission of Mercy program, this time in Flint.

Genesee District Dental Society applied to sponsor the 2020 MOM and presented at the Foundation Board meeting in September.

The dates for the 2020 MOM will be announced later, after arrangements have been made, according to Nancy Maier, MDA Foundation executive director.

The Mission of Mercy program takes place every other year. Previous Missions of Mercy have taken place in Saginaw, Big Rapids, Warren, and this year in Grand Rapids. The program provides dental services to underserved populations, utilizing hundreds of dental volunteers. More than 800 patients received care at the most recent MOM in Grand Rapids.
